

Draw the Path: Portfolio Sitemap + Toolkit

Week 1 — Setup Phase

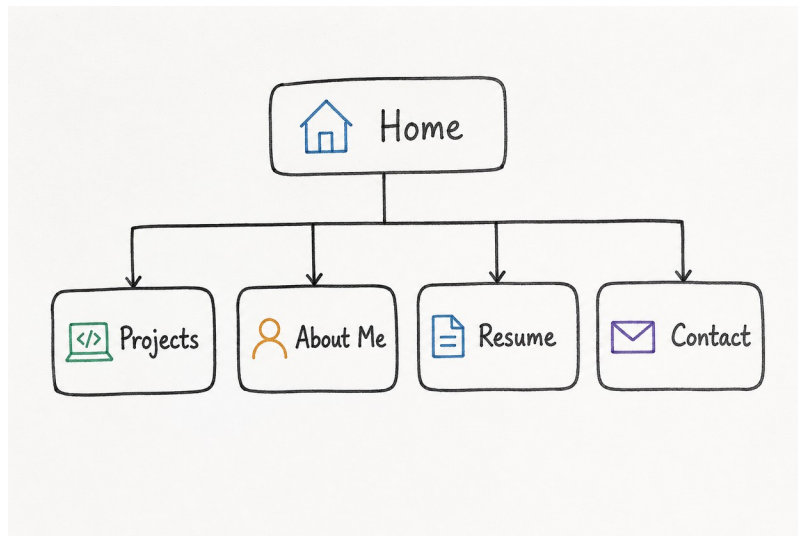

1. Positioning Statement

The claim, audience, and action that this portfolio is built around.

Element	Statement
Claim	I build secure AI-powered backend applications using FastAPI and modern AI integrations.
One Person	I'm proving this to a hiring manager looking for a junior AI backend engineer.
One Action	My goal is for them to contact me for an interview after seeing my work.
Proof Statement	I build secure AI-powered backend applications using FastAPI and modern AI integrations. I'm proving this to a hiring manager looking for a junior AI backend engineer. My goal is for them to contact me for an interview after seeing my work.

2. Portfolio Sitemap

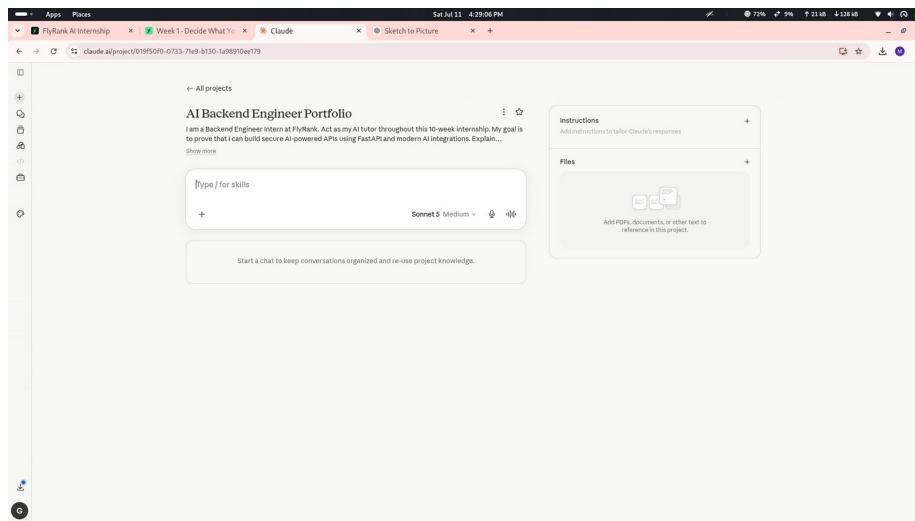

A sketch of the sitemap: the minimum pages needed to walk a hiring manager from landing to believing the claim to taking the one action.

3. AI Workspace Setup (Claude Project)

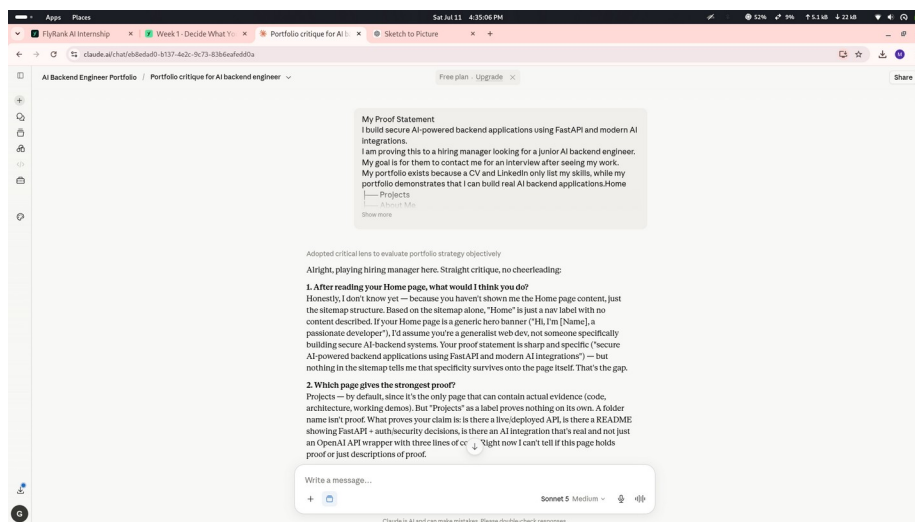

The dedicated Claude Project configured for this build, with the proof statement pasted into the custom instructions.

4. Pressure Test

A real prompt run against the sitemap to pressure-test it against the claim and the one action.
